Mosin-Nagant M39 Rifle

Mosin-Nagant M27 Rifle, Cal. 7.62X54R. First "True" Finnish modification of the M91. New upper handguard, rear band and bayonet lug configurations, protective ears added to front sight. Aperture fitted to leaf rear sight with graduations changed to metric. Barrel 68.6 cm (27"). Overall 118.1 cm (46.5").

No. 10MNM27 Cond. Very Good $52.46

Mosin-Nagant M39 Rifle, Cal. 7.62X54R. Lighter barrel version was the last modification of the M-91 designed for use by the Finnish services. Each M39 off the production line was test-fired. If it did not group 3-shots within 1.3" at 100 metres, it was rejected. Extremely exacting standard of performance. Changes to the front and rear sights to allow windage adjustments. New handguards and ingeniously designed conventional pistol-grip stock give this rifle a modern look. Barrel : 68.6 cm (27"). Overall : 118.1 cm (46.5").

No. 10MNM39 Cond. Very Good $59.96

Developed for the Czarist armies almost a century ago, Mosin-Nagant rifles have seen almost constant service, first with Imperial, then with Soviet and Warsaw Pact troops. The many models from 1891 to 1944 provide a compact half-century historical review of gun technology leading to the development of automatic weapons.

Model 44 Carbine, Cal. 7.62X54R was the last of the Mosin-Nagants, developed during WWII. With its standard cylindrical receiver, sling slots, and barrel handguard, it resembles the previous M38. However, it features a permanently fixed bayonet which folds down the right side when not in use. It has a tangent rearsight and hooded front sight. 5-rd, box mag. 102 cm (40") long without bayonet, 133 cm (52.25") long with bayonet extended ; 51 cm (20") barrel. Weighs 8.9 lbs. It is still in use by many Soviet satellites. 3 types available :

Additional Heckler & Koch Items

Pistols

Founded in 1949, Heckler & Koch are leaders in high-technology weapons, and are among the finest gun designers and manufacturers in Europe. A large part of HK's splendid reputation is due to the exclusive DRLB (delayed roller-locked bolt) system – the same technology that gives our HK hunting and sporting rifles their unexcelled reliability and precision.

P7 SERIES
Semi-Auto Pistols
9 mm Para.

A revolution in handgun technology: HKP7 can be drawn, cocked and fired in one continous motion, simply by squeezing the handgrip and pulling the trigger. No hammer to pull back, no separate safety to fumble with. Nor will it fire if accidentally dropped or bumped, even with a round in the chamber. Smooth acting with no external moving parts, it stays on target from first round to last. Novel 3-dot sighting system works fast even in poor light. M8 also features an ambidextrous magazine release behind the trigger guard, developed for the New Jersey State Police.

Famous Semi-auto Benelli Shotguns

Montefeltro Super 90 Semi-auto 12ga. Shotguns

Ingenious new design features (one-piece lower receiver, rotary head) have been incorporated, without in any way effecting the inertia operation of the Benelli system. Models are available in the varichoke or magnum versions. A special easy to use cut off device enables the cartridge in the chamber to be replaced rapidly with another from the magazine; a red disc visible on the cut-off lever indicates that the hammer is cocked. A shim kit enables the drop of the stock to be altered to 50 or 60mm (2½") with the greatest of ease, with no need for manual or mechanical modifications to the wood. The lower receiver is made of special ergal alloy, black finished. The nickel-chrome-molybdenum steel barrel is chrome-plated. Stock and fore-end are made of selected walnut, handcheckered with scratch proof polishing.

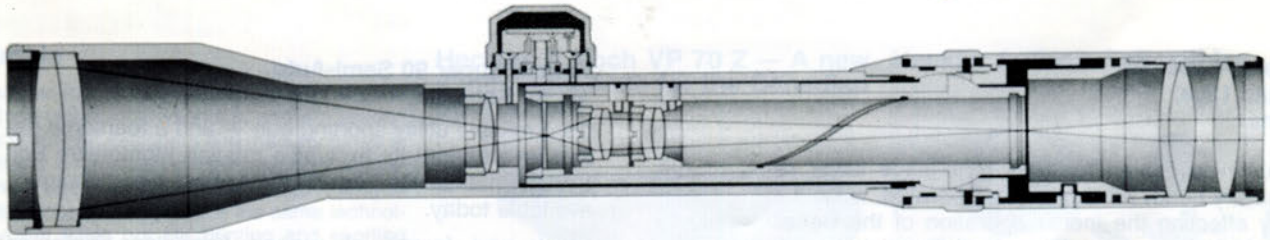
Schmidt & Bender Scopes From Germany Exclusively ours in Canada



Section View of our Telescopic Sight: Details Are Important

These are the essential optical components: eyepiece, reversal lens system, reticle/focal plane of objective lens, and objective lens.

The ultimate scopes for hunting-target, silhouette or varmint shooting. Rugged steel construction, excellent optics, and precise click adjustments meet the requirements of the serious shooter. A five step process assures a durable, corrosion resistant finish. The scopes are subjected to vibration tests, exceeding the demands of the most powerful cartridges, as well as environmental tests, ranging from -40 F to +122F, and rain testing. High precision seals resistant to oil, light and aging are used to prevent fogging. High quality optics begin with the best available raw glass which is polished to very close tolerances by highly skilled craftsmen. Lenses are then coated with an anti-reflective coating which is formulated for maximum light transmission. This makes the scopes brighter, even in poor lighting. A unique reticle control indicator always keeps you aware as to how much adjustment you have left and also makes it simpler to center your scope. Available in fixed-power or variable power models, and with choice of reticle (see chart below). Recommended for hunting are reticles number 4 and 8 as they are the best compromise for most hunting conditions. Reticle number one is tapered so as to cover less of the target. Comes complete with clear view lens caps.
